Weephole Covers are a stainless steel insert for weep holes

This is a universal solution for upgrading the outer wall and protecting the cavity against all kind of vermin.

- Easily application, no are tools needed
- Outstanding flexibility, fits in weep holes with a width ranging from 5 to 25mm
- Superb fixation, not manually removable
- Adapts neatly, also in skew weep holes
- Nice, seamless look, a piece of jewellery in the front wall
- Variable heights, easy to cut before mounting
- Strong stainless spring steel

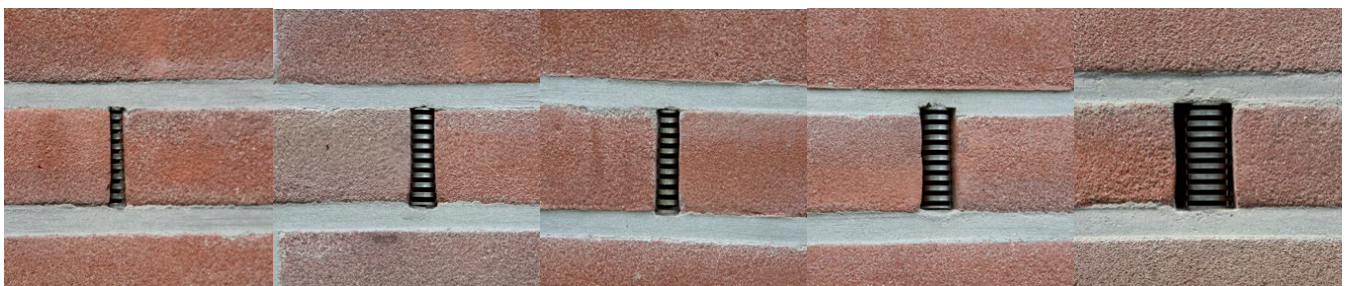

## **Weep holes in the front wall**

Weep holes in the front wall are necessary to ventilate and drain the cavity. That is why builders create them in specific spots. Not only will air and water travel through the weep holes, but also vermin, leaves and other dirt pass through the cavity.

Besides the often irregular, black weep holes are disturbing the sight of the front wall. These Weephole Covers are the perfect solution to protect the cavity and upgrade the front wall.

## **Eliminate unprotected weep holes!**

The width of weep holes is often very irregular and varies in practice from about 6 to more than 20mm! Not only are rats and mice annoying and harmful, but also bigger insects like bees and wasps are a threat. Unprotected weep holes are a perfect door to the cavity for those animals, our Weephole Covers will stop them.

The Weephole Cover is a functional, nice and durable accessory for the facade
