

MANUFACTURER'S INSTALLATION GUIDE

- Install the owl using the mounting hole on the base or fill with sand or gravel.
- For best results locate the owl higher than the problem area to ensure the wind activation parts keep working and the reflective eyes can be seen by the pigeons; for example, on roof-tops, garden sheds, fence posts.
- Fix by sticking on a pole with a one inch (25 mm) diameter. Alternatively, fill with sand or gravel then stick the owl onto the required surface. The hook on the base can be cable tied to tree branches.

PRODUCT SPECIFICATIONS

- Height: 40 cm (16").
- Width: 20 cm (8").
- Depth: 18 cm (7").
- Rotating head mounted onto a steel "free rotating spring".
- Cable tie hook on base for mounting on tree branches.
- Removable plug on base for filling owl with sand or gravel.
